## **PIPE TECH – A GLOBAL COMPANY DOING BUSINESS AROUND THE WORLD**

Pipe Tech for many years has represented the best engineered valves, vessels, and piping specialties from around the world. Most of the companies we represent have USA operation offices with other locations in free market countries. We have taken the opportunity to learn how to do business outside the USA offering both USA made and foreign made products abroad to remote locations. They include Moscow Russia, Lahore Pakistan, Hong Kong China, a USA funded water plant in Iraq, and Santiago Chile; to identify some of our largest foreign project sales. The origins of some of the products we represent and sell include Israel, Italy, France, Germany, China, Taiwan, Canada, and the United Kingdom. Many can claim 50 percent or more USA content for finished assembly in the USA.

Offering Design assistance along with presenting the correct product technology for the application is Pipe Tech's forte.

**Charlatte- Bladder type surge vessel, Destination Iraq**
